## **The Landing School's annual job fair will introduce the next wave of marine industry professionals**

Marine companies are invited to meet and interview current boatbuilding, yacht design and marine systems on April 2, 2010.

ARUNDEL, ME—The Landing School is inviting representatives from boat shops and yards around the world to meet The School's graduating class of 2010 at their annual Job Fair, Friday, April 2. Marine employers will have direct access to more than 80 educated, enthusiastic students who are seeking employment in the marine industry following their June graduation. Students from The Landing School's Boatbuilding, Yacht Design, Marine Systems and Composites programs will all be available to meet potential employers, and they will be allocating time for private one-on-one job interviews with select companies.

All marine businesses are invited to attend The Landing School Job Fair at no cost. This annual event is held for the benefit of the students and the marine industry. Representatives from marine businesses are invited to set up their literature tables at The School on April 2 at 11:00 a.m. and then join The School's staff and faculty for a tour of the facility and lunch. Beginning at 1:00 p.m., representatives will have the opportunity to present information about their companies to groups of students, and arrange for short interviews later in the day.

"We're getting feedback from the industry that business are starting to turn a corner and new work orders are coming in," says Barry Acker, president of The Landing School. "With growing business comes demand for well-trained professionals graduating from our programs."

Marine companies can confirm their attendance at The Landing School Job Fair by downloading a participation form from The School's website, [www.landingschool.edu](http://www.landingschool.edu), and returning it completed before March 19, 2010. This is a popular annual event, but space is limited and will be allocated to companies in the order in which they respond. Employers who are unable to attend but would like to have a presence at the Job Fair can forward your company literature and open-job descriptions by March 26 so we can make them available to our students. If you have questions about the Job Fair, contact Nicole Jacques at 207-985-7976 or [nicolejacques@landingschool.edu](mailto:nicolejacques@landingschool.edu).

The Landing School, located in Arundel, Maine, is an accredited, full-time, post-secondary school that educates and prepares people of all ages and backgrounds for careers in the marine industry. The School effectively prepares students to be practical designers, builders and systems technicians who work professionally on today's vessels, adapt to the industry's evolving technology and appreciate the traditions of the past. Students can earn either a diploma or an associate's degree in the available programs. The Continuing Education branch of The School provides short courses to current marine professionals across North America. The Landing School provides more information about its programs online at [landingschool.edu](http://landingschool.edu).
