Marinas International Goes Green with G-MARINE

April 11, 2011, Houston, TX -- As part of a corporate commitment to promote cleaner marinas and lakes, Marinas International has officially joined forces with Green Earth Technologies and is embracing the G-MARINE and G-OIL line of ultimate biodegradable, non-toxic products at its marina facilities in Kentucky, Tennessee and Arkansas.

We are always looking for ways to make the outdoor lake and boating experience more enjoyable for families and we are excited to bring the clean marina concept to a higher level at our facilities," said Marinas International Vice President Mark Stafford. "We firmly believe these new 'G' products will help us achieve our goals in this regard."

Marinas International will utilize G-OIL TC-W3 and 5W-30 motor oils in its fishing, sportboat and houseboat fleets. Stafford stated that G-OIL is ultimate performing as well as ultimate biodegradable. High on the list of accolades, the TC-W3 is approved by the National Marine Manufacturers Association (NMMA), while the 5W-30 holds the honor of being the world's first and only ultimate biodegradable motor oil to be approved by the American Petroleum Institute (API). In addition, Marinas International will use and offer for sale the G-MARINE appearance products that include Boat Wash, Hull & Bottom Cleaner, Fuel Spill Clean-UP! and Bilge Cleaner. G-MARINE products are made from plant oils and are non-toxic and ultimate-biodegradable, the highest level of biodegradability tested.

To help boat owners save time, effort and the environment, Marinas International will also sell the Green Machine Pressure Washing System that utilizes environment safe, non-toxic and ultimate biodegradable cleaners for boats and removal of mold and mildew.

"We believe that as a leader in the global marina market, we should take a strong leadership stance and position on the green front," added Stafford. "We have carefully researched this product line and believe it has tremendous potential to positively impact the environment we love. We strongly support the green movement and are pleased to do our part to protect our waterways,"

Participating marinas in Kentucky include Burnside Marina and Beaver Creek Resort on Lake Cumberland and Green Turtle Bay Houseboat Rentals on Lake Barkley. Additional locations are Holly Creek Resort and Eagle Cove Resort both on Dale Hollow Lake, Tennessee, and Brady Mountain Resort on Lake Ouachita, Arkansas.

ABOUT MARINAS INTERNATIONAL

Marinas International is a privately held company that owns and/or manages 28 marinas in 13 states. Having been active in the marina industry since 1984, Marinas International has successfully brought together leading professionals from the marina industry to build a powerful and effective team. Our recipe for success includes continuing education, renovation, quality control, convenience, and most importantly, providing a fun family atmosphere. It is our goal for all Marinas International marinas, whether owned or managed, to be the preferred recreational experience at, on, or near the water.
